

PROCEEDINGS OF THE SIXTEENTH  
ANNUAL MEETING OF THE  
CANADIAN SOCIETY FOR THE  
HISTORY AND PHILOSOPHY  
OF MATHEMATICS

University of Victoria  
May 31, June 1, 1990

Francine F. Abeles  
Kean College, New Jersey

Victor J. Katz  
University of the District of Columbia

Robert S.D. Thomas  
St John's College and University of Manitoba

1991  
CSHPM/SCHPM

## Table of Contents

Preface	v
Invited address	
<b>Judith V. Grabiner</b>	
Was Newton's calculus a dead end? A new look at the calculus of Colin Maclaurin	1
Contributed papers	
<b>J. L. Berggren</b>	
Greek and Islamic elements in Arabic mathematics	25
<b>Jacqueline Brunning</b>	
C. S. Peirce's relative product	39
<b>Craig G. Fraser</b>	
The mathematical origins of Lagrange's theory of planetary perturbations	51
<b>Victor J. Katz</b>	
Non-western mathematics in the university classroom	63
<b>I. Kleiner</b> (with S. Avital)	
Themes in the evolution of number systems	73
<b>Erwin Kreyszig</b>	
On Plateau's problem	91
<b>Sharon Kunoff</b>	
A curious counting/summation formula from the ancient Hindus	101
<b>A. K. Ray</b>	
History of space mathematics	108
<b>Jonathan P. Seldin</b>	
From exhaustion to modern limit theory	120
<b>J. J. Tattersall</b>	
Nicholas Saunderson: The blind Lucasian Professor	137
<b>Glen Van Brummelen</b>	
A survey of finite difference interpolation methods from Harriot to Newton	155
<b>Erica Dakin Voolich</b>	
Mathematics: A multicultural and historical approach in the elementary classroom	169
