

Proceedings of the CSHPM/SCHPM 18th Annual Meeting  
University of Prince Edward Island, Charlottetown, P.E.I.  
May 28-29, 1992

Table of Contents

Preface

Special Session: Ethnomathematics

Michael P. Closs, Guest Speaker <i>The Ancient Maya: Mathematics and Mathematicians</i> . . . . .	1
Sharon Kunoff <i>Some Inheritance Problems in Ancient Hebrew Literature</i> .	14
W. S. Anglin <i>Did Euclid Prove Unique Factorisation?</i> . . . . .	21
R. H. Eddy <i>Some Contributions of C. H. von Nagel to Plane Euclidean Geometry</i> . . . . .	29
Francine Abeles <i>Herbrand's Theorem and the Beginning of Logic Programming</i>	38
Abe Shenitzer <i>A Sketch of the Evolution of Fourier Series and Remarks on Fourier Integrals</i> . . . . .	46

## Contributed Papers

Erwin Kreyszig <i>Basic Ideas of Functional Analysis: Motivations, Roots, Early Developments . . . . .</i>	55
Israel Kleiner <i>Aspects of the Evolution of Commutative Algebra . . . . .</i>	70
J. J. Tattersall <i>John Colson's Two-Way Numbers . . . . .</i>	89
Glen Van Brummelen <i>Some Statistical Results on the Interdependence of Astronomical Tables in Ptolemy's Almagest . . . . .</i>	96
Sylvia M. Svitak <i>An Historical Approach to the Mathematical Study of Modern Factor Analysis: The Box Problem . . . . .</i>	109
Ajit Kumar Ray <i>History of Applied Mathematics - Carl Friedrich Gauss . . . . .</i>	128
