

Proceedings of the CSHPM/SCHPM 19th Annual Meeting
Carleton University, Ottawa, Ontario
May 30-June 1, 1993

Table of Contents

Preface

Special Session: Philosophy of Mathematics

Stuart Shanker, Guest Speaker
Turing and the Origins of AI 1

John Bell
Infinities and the Continuum 42

Contributed Papers

Sunoy Sanatani
On the Notion of Equality in Mathematics 46

Katye O. Sowell
Is Mathematics Discovered or Invented? 51

William S. Anglin
Interpreting Plimpton 322 56

Glen Van Brummelen
*Ptolemaic Interpolation: Method, Application and
Tabulation in the Almagest* 71

Samuel S. Kutler
*How the Ancient Greeks Could Have Discovered
The Pascal Triangle* 81

P. Rajagopal
Infinite Series in South Indian Mathematics, 1400-1600 . 86

Erwin Kreyszig <i>On the Calculus of Variations and Its Major Influences on the Mathematics of the First Half of Our Century</i>	119
Francine F. Abeles <i>The Birth of the Automatic Calendar</i>	150
William Demopoulos <i>Dummett on Frege's Philosophy of Arithmetic</i>	155
Craig Fraser <i>A History of Jacobi's Theorem in the Calculus of Variations</i>	168
Graham Solomon <i>From Groups to Semigroups</i>	186
A. Shenitzer and J. Sepr̄ans <i>The Evolution of Integration</i>	196
Thomas L. Bartlow <i>What Does 'Marginal' Mean?</i>	208
Katherine L. Hill <i>Hamilton and Bolzano on the Foundations of the Real Numbers</i>	220
J. J. Tattersall <i>William Whiston: The Longitudinal Latitudinarian</i>	230
Peter L. Griffiths <i>Multiangle and Subdivision Angle Formulae from Cardan to De Moivre</i>	261
Thomas Archibald <i>Learning French at Cambridge: the Cambridge Mathematical Physicist of the 1820s and 1830s</i>	264
Martin E. Muldoon <i>Mathematics as Relaxation: the Case of Éamon de Valera</i>	281
