

PROCEEDINGS OF THE

**The Canadian Society for History
and Philosophy of Mathematics**

**La Société Canadienne d'Histoire
et de Philosophie des Mathématiques**

Volume 20

Thirty-second Annual Meeting/Réunion Annuelle

Fourth Joint Meeting with

**The British Society for the History of Mathematics
La Société Britannique de l' Histoire des Mathématiques**

**Concordia University
Montréal, Québec
July 27-29, 2007**

Editor

**Antonella Cupillari
Penn State Erie, The Behrend College**

Table of Contents

Preface

Francine F. Abeles

The Tangled Tale of Dodgson's Condensation of Determinants. 1

Amy Aackerberg-Hastings

Euler and the Enlightenment Mathematicians: A Scottish Perspective. 12

Christopher Baltus

Euler's Continued Fractions and the Pell Equation. 24

Janet Beery

*Navigating Between Triangular Numbers and Trigonometric Tables:
How Thomas Harriot Developed His Interpolation Formulas.* 37

Rob Bradley

Euler's Resolution of Cramer's Paradox. 48

Fatema Chowdhury and Munibur Rahman Chowdhury

A Birthday Gift for Euler. 59

Munibur Rahman Chowdhury

T. Vijayaraghavan (1898-1955) and A. Weil (1906-1998): A Tale of a Friendship. 73

Edward L. Cohen

Important Indian Calendars. 83

Tony Crilly

Mathematical Education at Cambridge University in the Nineteenth Century. 94

Lawrence D'Antonio

How Euler Built the Britannia Bridge. 100

Gregg De Young

*QUṬB AL-DĪN AL-SHĪRĀZĪ'S "Demonstrations" of Euclid's Postulates:
Mathematical and Meta-mathematical Considerations.* 124

Jason Douma

Philosophical Intelligences: a potential model for teaching mathematics. 134

George Englebretsen

The Dodo and the DO: Lewis Carroll and the Dictum de Omni. 142

Raymond Flood

John Fauvel: life, labours and legacy. 149

Roger Godard

Some Examples of Symmetry and Mathematics in the XVIIIth and the XIXth Centuries. 163

Gavin Hitchcock <i>The many faces of “analysis” 1750-1850.</i>	175
Amirouche Moktefi <i>Lewis Carroll and the British Nineteenth-Century Logicians on the Barber Shop Problem.</i> . . .	189
David Orenstein <i>The Archival Record of Education and Research in the Mathematical Sciences in Nouvelle-France and Bas-Canada.</i>	200
Andrew Perry <i>The Advent of Conceptual Understanding in Nineteenth Century American Mathematic Textbooks.</i>	205
Josipa G. Petrunić <i>Clifford’s popular presentation of quaternions and non-Euclidean geometry: “The Common Sense of the Exact Sciences” as a reflection of Clifford’s physical and physiological preoccupations.</i>	212
Adrian Rice <i>What is the “Birthday” of Elliptic Functions?</i>	231
Edward Sandifer <i>Five pearls from Euler.</i>	246
Jonathan P. Seldin <i>More Thoughts on the Teaching Elementary Mathematics.</i>	259
Eugene Seneta <i>The “Inverse Probability” Controversy and Lewis Carroll.</i>	265
Joel Silverberg <i>Circles of Illumination, Parallels of Equal Altitude, and le Calcul du Point Observé: Nineteenth Century Advances in Celestial Navigation.</i>	272
Charlotte Simmons <i>Observations on Sir William Rowan Hamilton and George Boole.</i>	297
George P. H. Styan <i>A Philatelic Introduction to Magic Squares and Latin Squares for Euler’s 300th birthday.</i>	306
Bart Van Kerkhove <i>The Historicity of Mathematics: Computer Proof.</i>	320
Marina Vulis <i>History of Arab Cryptanalysis.</i>	324
Miriam Lipschutz-Yevick <i>Poetic Metaphor and Mathematical Demonstration: A Shallow Analogy.</i>	331
