

PROCEEDINGS OF THE

**Canadian Society for History
and Philosophy of Mathematics**

**Société Canadienne d'Histoire
et Philosophie des Mathématiques**

Volume 18

Thirty-first Annual Meeting/Réunion Annuelle

**University of Waterloo
Waterloo, Ontario
June 4-6, 2005**

Editor
**Antonella Cupillari
Penn State Erie, The Behrend College**

Table of Contents

Preface

Address from the President at the Annual Meeting

Francine F. Abeles

The Diagrammatic Logic Methods of Lewis Carroll and John Venn 1

Amy Ackenberg-Hastings

Joh Playfair in Letters 9

Christopher Baltus

When is a Negative Really a Negative? 19

David Bellhouse

A War of Words in Pictures: the Dispute between Montmort and De Moivre over the Probability Calculus. 31

Robert Bradley

The Genoese Lottery and the Partition Function. 47

Ed Cohen

The Iranian Calendar 62

Lawrence D'Antonio

Number Theory from Fibonacci to 17th Century Safavid Persia: a question of transmission of knowledge 75

Roger Godard

Convexity and the analysis of maximis and minimis. 101

Odile Kouteynikoff

About congruent numbers, as studied by Guillaume Gosselin, an algebraist in Renaissance France 113

Miriam Lipshutz-Yevich

Paul Lévy and the Dichotomy between the Normal and Other Stable Probability Limit Distributions. 123

Amirouche Moktefi

How did Lewis Carroll become a Logician? 136

David Orenstein

"Greenwich, ça n'importe! Où est PARIS?" 145

Edward Sandifer <i>Leonhard Euler, Textbook Author</i>	150
Jonathan Seldin <i>Curry's Formalism as Structuralism</i>	162
Joel Silverberg <i>The Sailings: The Mathematics of Eighteenth Century Navigation in the American Colonies</i> . .	173
Jim Tattersall <i>Arthur Buchheim: Mathematician of Great Promise</i>	200
Robert Thomas <i>Mathematics as the science of relations as such</i>	209
